# RI TRANSPARENCY REPORT

2020

ISATIS Capital

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

## PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

ISATIS Capital, founded in 2013, is an independent private company based in France. It was formed thanks to the spin-off of the private equity activity of BNP Paribas. ISATIS Capital is owned by its employees. ISATIS Capital has developed 3 types of funds. First range called "fonds fiscaux" is made of tax-incentivised funds regulated by the French regulation authority. Second range is made of a fund specifically designed for life insurance contracts. Finally, the third range is composed of funds aimed at institutional investors.

To-day, ISATIS Capital only invests in growth capital operations. However, we can carry out some mixed operations when some historical shareholders wish

to sell their shares. In those case, the level of the debt leverage should preserve the growth of the company.

<p>ISATIS Capital is a specialist in growth financing in France and specifically invests in growing, profitable, innovative and exporting SMEs. Indeed, by financing the real economy, we contribute to sustainable value creation socially, environmentally and financially. Our investment philosophy is based on the conviction that we cannot ignore the ESG issues that are essential in creating sustainable value and performance for the companies in which we invest. Furthermore, our objective is to offer our institutional clients high-performance, high-quality investment products and avoid any reputational risks related to these investments.</p> <p>To do this, we consider the PRI's principles as a roadmap and we have formalized an "ESG Policy" with indicators encompassing the environment, the social and the governance. A "Charter ESG" has been published on our website.</p> <ul style="list-style-type: none"> <li>• The integration of ESG is important from the beginning to the exit of the investment process (First contact, Due diligence, follow up during the investment, measurement of the progress)</li> <li>• Exclusion of sectors which have negative environmental and healthy impacts on people and planet</li> <li>• Transparency: Reporting on ESG issues about our investments on a yearly basis</li> <li>• Support role of ISATIS Capital with the management of the companies to improve their CSR.</li> </ul>

**SG 03.1** Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

**SG 03.2** Describe your policy on managing potential conflicts of interest in the investment process.

The conflict of interest policy specifies two main principles:

1. ISATIS Capital authorized itself, depending on the conflict of interest situations to:
  - carry out the operation to the extent that the organisation appropriately manages the potential conflict of interest situation.
  - inform the client in the case that some conflicts of interest may remain and provide necessary document to the client on the origin and nature of the conflicts of interest.
2. ISATIS Capital has set up an internal organisation to:
  - prevent emergence of conflict of interest by:
    - implementation of an internal control system
    - separation of functions that may generate potential conflicts of interest
  - ensure that the investment product is in line with the client's expectations and with what ISATIS Capital has presented.
  - prohibition of any personal financial transaction by the employees which would be in breach with the rules set up by ISATIS Capital. Co-Investment by employees is prohibited.

The prevention of conflicts of interest is compiled through a set of documents, procedures and control: code of Ethics, operating charter, mapping of conflict of interest, conflict of interest management policy, procedure for preventing and managing conflict of interest,

The 2 questionnaires sent to the holdings have been improved for 2020 allowing the holdings to respond more easily.

We have also integrated an update of the questions concerning the approach on the E & S issues and the governance of the holdings. The update has to be done every 2 years.

The objective for the year 2020 is the increasing of:

- the monitoring of the ESG practices thanks to site visits and meeting with people in charge of E&S issues. We expect to visit at least 4 companies.

- the influence of ISATIS Capital on the board for improvement on the transparency and on practices concerning the E&S issues. To do this, in 2019, we carried out our first ESG studies based on declarative information from the questionnaires with **ESG recommendations** for our representative on the board that he should put on the board's agenda.

**SG 07.2** For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

The **CEO** leads the investment committees for the new investments and the monitoring of the existent participations. His role is to promote and ensure that the incorporation of ESG is done during the Due Diligences/follow-up by the PM and analysts. He has the decision not to invest in company whether the risks are too important and no way to resolve them in the future. This case never happened.

The **Head of Business Development and Strategy is the contact of the institutional clients** and responsible of the respect of the requests of clients about the management of the mandates. As such, he has specifically been the champion of the ESG project inside ISATIS Capital. However, he has delegated the supervisory of the implementation to an external consultant with whom, he has regular follow-up points on the implementation and helps the consultant to resolve some problems when they arise.

The **portfolio managers are the direct contact of the companies** in which they invest or aim to invest. Moreover, they have a key role to play within the board meetings to push the management for an implementation of the CSR. During the phase of the implementation of ESG within ISATIS Capital, they were in charge to send the ESG questionnaires to their participations and to communicate on the ESG Strategy of ISATIS. Once the implementation has been made, they are responsible of the analysis the ESG areas and they should identify the points which could represent some risks for the performance of the investment funds and/or that are not in line with the requests fo the clients. During this phase, the external consultant helps them. They are in charge to communicate and monitor any incident on ESG.

The **analysts are the support of the portfolio managers** and in charge of the analysis of the responses to the ESG questionnaires and of exchanging with the companies when they need more clarification. Their responsibilities include incorporating in the investment notes or follow-up notes any add-value information regarding the ESG areas. This allows the members of the Investment Committees get all relevant information before making decision and allows the portfolio managers to lead discussion about ESG within the board meetings.

The **external consultant** has been recruited by ISATIS Capital at the last quarter of 2017. The objectives of the Consultant was to build the ESG incorporation process of ISATIS Capital and help ISATIS Capital to sign to the PRI principles (ESG Policy, ESG questionnaires, ESG swot and analysis, training of the portfolio managers and analysts, ESG provision in shareholder agreement). The consultant supervises the incorporation and should arise any failures about the respect of the ESG incorporation or of PRI principles with the CEO and Development and Strategy Director. Beyond those objectives, the consultant provides ESG studies and validates the ESG issues of each holding with the analysts and set up an action plan addressed to the portfolio manager.

**SG 07.3** Indicate the number of dedicated responsible investment staff your organisation has.

8

**SG 07.4** Additional information. [Optional]

The entire management team is involved in the implementation of the ESG incorporation process. We believe that the best way to successfully support companies on the path to progress in taking ESG issues into account is to involve the Investment Director (portfolio manager), who is the main contact in this area with the companies he/she follows. The pedagogical aspect is strong and based on a constructive and trustful relationship with the leaders. In addition, we believe it is essential that the ESG integration process be designed and implemented with investment managers to ensure that the formalization is relevant to our specific universe of SMEs. The number 8 above is the number of the investment director in 2019 (6), the CEO and the Development and Strategy Director.

In 2019, ISATIS Capital has accelerated ESG incorporation in the decision-making process. During this phase, the investment team was focused on:

- Integrating the ESG dimension in the investment process which includes the collect of the data and the studies on ESG issues concerning each holding
- The sensitization of the management of the holdings about the necessity to set up a formalized CSR policy when it is justified

The priority is firstly to ensure the quality of our work before to contribute to external group. Indeed, the work made by the Investment team during 2019 has not allowed enough time to contribute effectively to PRI working group in 2019. Our size does not yet allow us to carry out these actions while we are not affected by the asset allocation.

PE 02.2	Describe how your organisation outlines expectations on staff and portfolio companies' approach towards ESG issues in investment activities.		
<p>Pre-investment process:</p> <p>ISATIS Capital expects its investment managers (PM) and analysts to assess at the outset of discussions with candidate companies the risks/opportunities, strengths and weaknesses of the company in addressing ESG issues. A specific due diligence questionnaire has been created to this end. A risk scale must be established in the investment notes based on management's knowledge and sensitivity to ESG issues, the degree of management acceptance to progress and the level of transparency. Those different points should help the investment committees to take a decision. In 2019, it has been done automatically.</p> <p>Post-investment process:</p> <p>Once the investment is done, the portfolio managers should arise the ESG topics regularly during the board meeting. It is in progress, seven specific analyses on ESG have been done with some recommendations to discuss in the board.</p> <p>A follow-up should be made once a year where the companies should provide ESG KPIs on E and S and the analyst should report an analyse on the ESG trend of the companies.</p> <p>In case of ESG incident, ISATIS Capital expects its portfolio managers to react, alert and help the company to solve the problem.</p>

PE 05.2	Describe your organisation's approach to incorporating ESG issues in private equity investment selection.		
<p>The role of the taking into account of ESG factors is important from the very beginning of the investment decision- process. Indeed, before making a long-term commitment with a company, it is important that we are comfortable with ESG risks. This begins with the choice of sectors with relatively low environmental externalities (NICTs (New Information and Communication Technologies), Business Services, Health, Advanced Industry).</p> <p>The fact that the company that we are analysing has no CSR policy concerning the ESG issues is not a factor in the abandonment of our investment. Nevertheless, before the final investment decision is made, we validate two essential points:</p> <ul style="list-style-type: none"> <li>- The business model of the analysed company must not be based on social or environmental risk taking</li> <li>- The managers are open to improve their ESG practices and discuss with Isatis-Capital on the actions plan for the future development.</li> </ul> <p>A specific Due diligence questionnaire is submitted to the new company covering the 3 pillars ESG mostly focused on qualitative approach. The objective of this questionnaire is to measure the knowledge of the managers on their ESG issues/challenges and how ISATIS Capital will help and support the company to improve their practices in terms of ESG in the future.</p>

The most important thing is to ensure that the managers are open to improving their practices in the future with the help of ISATIS Capital.

- We do not track this information

**PE 06.2** Describe how this information is reported to, considered and documented by the Investment Committee or similar.

In 2019, the ESG Incorporation policy have been done for all new investments as follow: the information is reported in the investment note on a specific page dedicated on ESG issues described with ESG SWOT and comments about the degree of risks and the knowledge and the openness of the managers on these topics.

The managers have to accept in the shareholder agreement to provide each year the KPIs on E & S to allow the measurement of the trends. Isatis-Capital expects the "best effort", aware that its universe of investments is composed of very small companies. Those Kpis should help Isatis-Capital to identify the points where some actions have to be taken to remediate to the issue.

- 10-50% of portfolio companies
- <10% of portfolio companies

**PE 09.3** Indicate ESG issues for which your organisation typically sets and monitors targets (KPIs or similar) and provide examples per issue.

- Environmental
- Social
- Governance
- We do not set and/or monitor against targets

- No

**PE 09.4** Additional information. [Optional]

In 2018, we began to collect the KPIs of our portfolio companies concerning the year 2017. In 2019, 21 companies have provided ESG information and Kpis and represented 60% of invested asset. Our objective of 100% has been postponed to next year. Indeed, some companies were mobilized on their development such as acquisitions and had no time to respond to our request because they lacked human resources to do it.

The target of our investment universe is small companies. Few of them have a formalized CSR policy. The first challenge for ISATIS Capital is to obtain that the companies measure their impact on E & S through their energy and water consumption, the waste management, the human capital management.
